DETAILED ACTION

Claims 2, 4-5, directed to the species of other embodiments withdrawn from further consideration since claims 2 and 4-5 are depend upon or otherwise include each of the limitations of an allowed generic claim 1, as required by 37 CFR 1.141.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- Claim claims 8-11.

The following is an examiner's statement of reasons for allowance:

The prior art of record do not teach or suggest, in the claimed combination thereof, a wound-rotor transformer comprising a primary winding wound on a core by means of an insulator, a first secondary winding adjacent to the primary winding and being disposed at its one side, a second secondary winding adjacent to the primary winding and being disposed at the other side, a primary input terminal for the primary winding, a secondary high tension terminal for the first secondary winding, a secondary high tension terminal for the second secondary winding, and a ground terminal for the second secondary winding; *wherein the primary winding is connected to the primary input terminal and the lead wire of one end of the first secondary winding is connected to the secondary high tension terminal for the first secondary winding, and the lead wire of the other end of the first secondary winding is connected to the ground terminal for the first secondary winding, and the lead wire of one end of the second secondary winding is*
